

If you have answered **yes** to all of the questions, your **HP-ID-Module** can be replaced by the **SYSKOMP-ID-BOX** and can be checked immediately. Carry out the following 11 steps:

1. Shut down your system (**HP-UX** users) and switch the computer off.
2. Switch the toggle-switch at the front panel of the **SYSKOMP-ID-BOX** into the right ("**Normal**") position.
3. Remove the cable end marked with two dots from the **HP-ID-Module** and plug it into the left receptacle of the **SYSKOMP-ID-BOX**, also marked with two dots.
4. Remove the cable marked with one dot from the **HP-ID-Module** and plug it into the right receptacle of the **SYSKOMP-ID-BOX**, also marked with one dot. Now the **SYSKOMP-ID-BOX** is connected.
5. Note the serial number of your **HP-ID Module**. Replace the dots in step 9 with this serial number. Your **HP-ID-Module** is no longer needed.
6. Switch the system on and load your operating system.
7. If your keyboard is set to capitalization, shift into small-letter mode using the "**Caps**"-key (next to "**CTRL**"). Small letters will now be printed. For capitalization, one has to press the "**shift**"-key.
8. Switch the toggle-switch at the front panel of the **SYSKOMP-ID-BOX** to the left, into position "**Learn**". Do not be irritated by the fact that the keyboard has been disconnected from the computer and that subsequent keystrokes will not be displayed on the screen.

9. Type Test?=46084A.....A..... on the keyboard. Replace the dots (".....A.....") with the serial number of your HP-ID-Module (see step 5).

10. Switch the toggle-switch at the front panel of the SYSKOMP-ID-BOX back to the right, into "Normal " position.

Now your input will appear on the screen without a question mark. If you have made a typing error and a different message is displayed, repeat steps 7 to 10.

11. Load and start your software.

Now the SYSKOMP-ID-BOX is functioning in place of your HP-ID-Module. Your software can be used as usual. You will find a detailed description of all of the possibilities of the SYSKOMP-ID-BOX in the following sections. As the installation of the SYSKOMP-ID-BOX has already been performed, you can skip chapter 2 ("Installation") and continue with chapter 3 ("Setting serial numbers").
